Summary

Full-Stack Web-Developer, detail oriented, values efficiency and clear communication. Confident in React, Node, Javascript, CSS, HTML, SQL. Has worked with 3rd party API's, ORMs, PWAs, and MongoDB/Mongoose. Always interested in learning new tools and frameworks.

Technical Skills

Languages: Javascript, CSS, HTML, Git, SQL, MongoDB
Technologies: React, Redux, Node, Express, jQuery, Bootstrap, Sequelize, Mongoose

Projects

Tracking Employees | GH | **Command-Line Application**
Tech Used: Javascript, Node, Inquirer, Node-Util, SQL

- This command line application fulfills all CRUD operations by allowing the user to create and delete employees, roles, and departments; As well as view employees by department, role, or manager and update said role.
- Implemented async await promise functionality to map all current rows from a table to be presented to the user within an inquirer prompt.
- Successfully used foriegn keys and inner join to associate employees with their designated department.

Vamp_Mask_API | GH | **Back-End**
Tech Used: MongoDB, Mongoose, Node, Express, JavaScript, HTML, CSS

- RESTful API inspired by vampire masquerade game to assist in character creation.
- Uses Node Express Server and Router to respond with JSON from MongoDB database.
- Uses HTML / CSS for landing page regarding documentation for how to use API with mobile responsiveness

Cocktail_Coterie | GH | **Front-End**
Tech Used: Node, Express, Handlebars, NodeFS, SQL, Sequelize, jQuery, Bootstrap, Axios, Passport, Bcrypt

- This app allows the user to organize an online cocktail party and send their friends an invite containing the cocktail ingredient list, and personal zoom link.
- Used Handlebars, HTML, CSS and Bootstrap to create multiple views of a clean and mobile responsive webpage.
- Used NodeFS to take user inputs and create a new html page, with an original url, to be used as an invitation link.

Experience

Tutor & Teaching Assistant   Jan 2021-Current
Trilogy Education   Remote
- Supplied support for students by noting struggle areas during class and reviewing during weekend office hours.
- Increased my knowledge base on the newest technologies by learning the continuously updated curriculum.
- Gave guidance during debugging by sharing my expertise in how to read error messages, where errors are commonly found, and where to console.log in order to find the problem when errors messages are not present.

Front-End Web Developer   Oct 2020-March 2021
Cerbanimo   Remote
- Utilized useState and useEffect inside React to manage data from user inputs throughout the application.
- Quickly and efficiently built several components utilizing Bootstrap.
- Assured accessibility standards writing clean and efficient code with descriptive comments and good naming conventions.

Education

Full-Stack Web Development Coding Bootcamp: Kansas University, Overland Park, Kansas (2020)
